New Replacement Product for COP-PAS with Indel Order No. 611143600

With this letter, we would like to inform you that we have discontinued the production of the COP module with label COP-PAS and will now produce and deliver only the new replacement product with label COP-PAS and option LEX. The product names COP-PAS modules change as follows.

Old COP-PAS Module:

Label:	COP-PAS
Indel Order-No.:	611143600
Product Description:	Passive GinLink fieldbus coupler

New COP-PAS Module (Replacement Product):

Label:	COP-PAS
Option:	LEX
Indel Order-No.:	611143630
Product Description:	Passive GinLink fieldbus coupler and GinLink expander

The new COP-PAS module with option LEX is equipped with an additional connector for GinLink extensions. You can find more information in our COP Hardware Manual https://www.indel.ch/Downloads-Indel/Documentation/COP/COP_Hardware_Manual_en.pdf on pages 40 and 41. The replacement product only contains one new function and has no influence on the existing software and hardware configurations.

Despite the added value of this card, Indel AG decided to continue offering the replacement product at the same price conditions as its predecessor (without option LEX).

In the future, we will neither offer the COP-PAS module with Indel Order-No. 611143600 as a new part nor as spare part. Existing customer orders with the Indel Order-No. 611143600 are automatically rewritten to the new module with option LEX and Indel Order-No.: 611143630.

Please do not hesitate to contact us if you have any technical queries or inquiries about your current orders.
